2016 Environmental Candidate Questionnaire

CAMPAIGN CONTACT INFORMATION

Candidate Name: Senator David Carlucci

Office Sought (district if applicable): 38TH Senate District

Facebook Page: www.facebook.com/davecarlucci/

Twitter handle: twitter.com/davidcarlucci

Please share your accomplishments or experiences that indicate your commitment to advancing a pro-environment agenda. These experiences may be professional or personal.

I have been proud to consistently receive the endorsement and support of the NYLCV. I've carried bills to put a complete halt on hydrofracking in New York State. Additionally, I support passing microbead legislation that will keep these toxic products out of our waterways. I've also consistently supported replacing the Indian Point Nuclear facility with clean renewables. Finally, I have called for safety improvements to prevent environmental disasters on our rail ways by ordering a study of all major crossings and a review and revision of investments in infrastructure improvements.

Please indicate your level of commitment to, and if applicable your recent personal and professional activity with respect to, the following issues:

(To ensure your responses address the issues NYLCV and its partners are most concerned about, please review [NYLCV's 2016 State Policy Agenda](#))

Ensuring adequate funding for the environmental agencies and programs

Iv consistently supported mainting funding levels and in most cases the need to increase funding to agencies and program which deal with the environment.

Addressing the causes and effects of climate change (e.g., clean energy and emission controls)

I fully support measures to enhance our states dependence on greenhouse gas and would support emissions controls on large prolutlers. I fully believe climate change is manmade and will be the biggest test of our species for further generations.

Protecting the health of New Yorkers and their communities (e.g., toxics, air quality, food quality and security)

Fully Support

Conserving and protecting natural resources (e.g., water, open spaces, habitat, organic recycling)

Fully support. I sponsor two large clean up days in my district each year attended by hundreds of volunteers. I also passed legislation to create a water task force in Rockland county that will study ways to improve conservation in our area. This was in response and opposition to a disastrous plan by United Water/Suez to put a desalinization plant on the Hudson river.

Investing in better, smarter infastructure (e.g., transportation, electrical grid, green infastructure, smart growth, rail transport of crude oil)

In addition to supporting safe rail ways I also have sponsored legislation to include permeable surface requirements in new construction that will improve runoff filtration and prevent groundwater pollution.
